EXECUTIVE BRIEF

GAISSF™—MITRE ATLAS Mapping

Website & Executive Summary — MITRE ATLAS v2026.09

GAISSF-CRO-025 | Informative crosswalk | Draft for Publication

Version 1.0 | Updated 6 October 2026

© 2026 ODA3 Pvt Ltd

- All 59 GAISSF controls assessed.
- All 16 current ATLAS tactics represented.
- 82 priority AI-specific techniques mapped.
- 112 documented control-to-technique relationships.
- Machine-readable JSON and spreadsheet registers included.

Current source baseline

MITRE ATLAS content release v2026.09, released 15 September 2026. The current release contains 16 tactics, 120 techniques, 88 sub-techniques (208 technique objects total), 40 mitigations and 73 case studies. The priority mapping subset in this publication remains bounded at 82 techniques/sub-techniques.

Appropriate uses

- Threat modelling and abuse-case development
- AI red-team and adversary-emulation planning
- Control selection and evidence reuse
- Detection and telemetry gap analysis
- Incident-readiness and assurance scoping

What the mapping does not establish

- MITRE endorsement or certification
- Automatic prevention or detection of mapped techniques
- Exhaustive procedure coverage
- A substitute for ATT&CK or environment-specific threat intelligence
- Regulatory compliance or safe harbour
