EXECUTIVE BRIEF

GAISSF™–NIS2 Mapping

Website & Executive Summary — Directive (EU) 2022/2555

GAISSF-CRO-029 | Informative crosswalk | Draft for Publication

Version 1.0 | Updated 6 October 2026

© 2026 ODA3 Pvt Ltd

Document ID	GAISSF-CRO-029
Classification	Crosswalk — informative
GAISSF baseline	GAISSF v1.0 — 59 controls
External baseline	Directive (EU) 2022/2555
Distribution	Website / GitHub
Status	Draft for Publication

Primary use cases

- NIS2 readiness and internal gap assessment
- Evidence reuse from GAISSF implementation
- Management and board briefing
- National-law implementation planning
- Audit and assurance scoping

Key findings

GAISSF provides strongest support for governance, cybersecurity risk management, supply-chain security, incident readiness, continuity and technical assurance. It does not determine whether an entity is essential or important, replace national law, satisfy statutory reporting deadlines or prove compliance.

Publication package

- Full crosswalk document
- Detailed XLSX mapping and gap registers
- GitHub-ready Markdown edition
- Machine-readable JSON dataset

D9 mappings are additional/conditional. Where Physical AI or cyber-physical actuation is in scope, PAI-SF™ v1.0 may be used alongside GAISSF; CSX-PAISF-004 is mapping only and does not establish equivalence, evidence sufficiency, operating effectiveness, legal compliance, or automatic conformance.

Important limitation

NIS2 must be applied through the relevant Member State transposition law and competent-authority procedures. Organisations must validate jurisdiction, sector, size, entity classification, applicable national measures, reporting channels, and any directly applicable Implementing Regulation (EU) 2024/2690 requirements before relying on a mapping.

Source baseline

Directive (EU) 2022/2555 remains in force. Commission Implementing Regulation (EU) 2024/2690 is treated separately for specified entity classes. Current legal/source status rechecked 6 October 2026.
