EXECUTIVE BRIEF

GAISSF™–HIPAA Mapping

Website & Executive Summary — 45 CFR Parts 160 and 164

GAISSF-CRO-035 | Informative crosswalk | Draft for Publication

Version 1.0 | Updated 6 October 2026

© 2026 ODA3 Pvt Ltd

Overview

GAISSF-CRO-035 provides an informative crosswalk between GAISSF™ v1.0 and selected operationally material HIPAA provisions in 45 CFR Parts 160 and 164. It is designed for healthcare security, privacy, compliance, assurance, and AI-governance teams assessing where AI-specific controls may support, but do not replace, HIPAA obligations.

Package Coverage

- 59 GAISSF™ controls; Applicable-Control Baseline = 52 D1-D8 + applicable D9
- 39 operationally material HIPAA provisions
- 163 forward mapping records
- Privacy, Security, Breach Notification, and Enforcement Rule coverage
- Reverse coverage and residual-gap analysis

How to Use It

Use the register to identify potentially reusable controls and evidence, then complete HIPAA-specific applicability, Security Risk Analysis, privacy, breach-notification, documentation, and legal-permission assessments. The crosswalk does not establish compliance, evidence sufficiency, HHS endorsement, or automatic conformance.

Notably Absent

The package does not claim HHS endorsement, HIPAA certification, lawful-use/disclosure determinations, evidence sufficiency, or automatic satisfaction of required or addressable implementation specifications. The 2024 Security Rule NPRM remains non-binding; current Privacy Rule obligations reflect the 2025 partial vacatur and remaining effective Notice of Privacy Practices changes.
