© ODA3 Pvt Ltd

Document Control

Doc ID	ODA3-2026-06-WHP-STD-004
Doc Type	White Paper — Licensing Model (WHP)
Framework Tag	UAIF™ v1.0
Regulatory Crosswalk Tags	GDPR (Art. 4(1) personal data, Art. 4(5) pseudonymisation, Recital 26 anonymous data)
Evidence Tier	Third-party licence facts are T1 (published licence texts). ODA3 Institute programme terms are statements of policy; GEL v1.0 governs licensing, and UAIF-IP-001 applies subject to it.
Incident Provenance	Not applicable
Audience	General Counsel, CFOs, Compliance Officers, Standards Body Participants
Publish Date / Review Cycle	Issued June 2026; updated 04 October 2026; review cycle: quarterly
Classification	Public

UAIF Licensing Model

GEL v1.0 Publication and Commercial Rights Architecture

Methodology Note: This white paper summarises how UAIF™ components are licensed and governed. It is informative, not a licence. The GAISSE Ecosystem Licence (GEL) v1.0 governs licensing; UAIF-IP-001 (IP Policy) governs UAIF IP administration subject to GEL v1.0. Statements about third-party licences are drawn from each project's published licence or terms of use.

UAIF™ is a framework of ODA3 Institute, referenced under the GAISSE Ecosystem Licence (GEL) v1.0.

1. Licence Architecture

UAIF™ is published under GEL v1.0, a single source-available licence that is non-commercial by default. GEL v1.0 does not define licence tiers. Individual UAIF components are made available on different terms: some are covered by GEL v1.0 directly, while controlled resources, contributions, data and marks are governed by separate written agreements or policies (Section 4). ODA3 Institute retains commercial, trademark and controlled-publication rights.

Component	Licence	Rationale and Commercial Impact
Core Specification	GEL v1.0 (Non-Commercial)	Enables broad non-commercial adoption with attribution (GEL v1.0 Sections 4 and 6). Commercial implementation requires a separate written licence from ODA3 Institute (GEL v1.0 Section 17). No copyleft obligation is imposed, which allows ODA3 Institute to offer separate commercial licences alongside non-commercial use. Comparable in approach to other source-available licences that restrict certain commercial uses (cf. Business Source License, Elastic License 2.0), though their terms differ.

Component	Licence	Rationale and Commercial Impact
Reference Implementation (Python)	GEL v1.0 (Non-Commercial)	Publication is subject to the applicable ODA3 Institute release gate and authoritative repository listing. Non-commercial use with attribution. Commercial embedding in products or services requires a separate written licence from ODA3 Institute (GEL v1.0 Sections 3.5, 5.3, 17). Under its patent non-assertion covenant (TCR-STD-002 §13.3), ODA3 Institute will not assert patent claims it owns or controls against conformant non-commercial implementations; the covenant does not address third-party patents.
Conformance Test Suite	GEL v1.0 (Non-Commercial), on publication	Developed; not yet published. No public conformance service or certification outcome is represented as available in UAIF v1.0. Conformance authority is exclusively reserved by ODA3 Institute (GEL v1.0 Section 10.5); conformance mark use requires ODA3 Institute written authorisation (GEL v1.0 Section 9.3).
Sector Calibration Packages	Proprietary Commercial Licence (UAIF-LIC-003) + CLA	Controlled sector-specific implementation resource; availability and rights require a separate written agreement. Contributors grant ODA3 Institute a perpetual, worldwide, irrevocable, royalty-free, sub-licensable and transferable commercial licence to their contributions (GEL v1.0 Section 8; UAIF-CLA-002); contributors retain copyright (UAIF-CLA-002). Rights asymmetry applies (GEL v1.0 Section 8): ODA3 Institute receives full commercial rights, while a contributor's own use remains non-commercial unless separately licensed.
UAIF Brand and Certification	Trademark — registration application pending (GEL v1.0 §9.1) + ODA3 Institute exclusive certification authority (GEL v1.0 §10.5)	ODA3 Institute holds all certification, accreditation and audit authority (GEL v1.0 Section 10.5). Any UAIF-Compatible or UAIF Certified designation requires written authorisation from ODA3 Institute (GEL v1.0 Section 9.3); no such designation is currently issued. Any future assessment or certification service will be announced separately after its governance and operational gates close.
Anonymised Benchmarking Data	Proprietary + Data Contribution Agreement (UAIF-DCA-004)	Contributions require explicit upfront consent to commercial use (UAIF-DCA-004). Data must be anonymised before submission so that it is no longer personal data under GDPR Article 4(1) (see Recital 26). ODA3 Institute would retain rights to aggregated data for use in commercial products. Handling of aggregated data on dissolution is governed by UAIF-DCA-004; GEL v1.0 Section 16 covers archive deposit of the framework itself, not contributed data. No benchmarking data has yet been collected.
Scoring Algorithm	Defensive Publication (UAIF-DPR-007)	Defensive publication places the scoring method in the public prior art, intended to prevent any party — including ODA3 Institute — from obtaining patents on the disclosed method that could block conformant implementations. This programme operates under ODA3 Institute's IP framework per GEL v1.0 and UAIF-IP-001, and supports ecosystem trust.

2. Comparable Models

UAIF follows a familiar pattern in which a freely usable specification layer supports a separate commercial layer. The comparison is illustrative only: unlike the open-licence examples below, UAIF is source-available and non-commercial by default, so commercial use requires a separate written licence. **[T1]**

Standard	Open Layer	Commercial Layer	Revenue Mechanism
OpenAPI / Swagger	Specification (Apache 2.0)	Commercial tooling (SwaggerHub)	SaaS subscription
Kubernetes	Core (Apache 2.0)	CNCF ecosystem; enterprise distributions	Commercial support + certification
OpenTelemetry	Specification + SDK (Apache 2.0)	Observability platform integrations	Vendor add-on revenue
CVSS (FIRST.org)	Specification (free public licence from FIRST, with attribution conditions)	Training and tooling ecosystems	No direct CVSS revenue model; FIRST is a non-profit and membership is not required to use CVSS
UAIF (ODA3 Institute)	Specification + reference implementation (GEL v1.0 — source-available, non-commercial); conformance test suite developed, not yet published	Calibration packages; future certification and data reports (not yet available)	Commercial licences, subscription and consulting; certification when available

3. Notably Absent

This licensing model does not include, and this paper does not claim, the following:

- No open-source licence: GEL v1.0 is source-available and non-commercial by default; it is not an OSI-approved open-source licence.
- No licence tiers: GEL v1.0 is a single licence. Separate agreements cover commercial use, contributions, data and marks.
- No commercial rights from public availability: publication or attribution alone does not grant redistribution, derivative or commercial-use rights beyond GEL v1.0.
- No direct revenue from non-commercial use: non-commercial use of the Core Specification and Reference Implementation with attribution is free under GEL v1.0.
- No operational certification or conformance service: the Conformance Test Suite is developed but not yet published, and no UAIF-Compatible or UAIF Certified designation is currently issued.
- No registered UAIF trademark: registration applications are pending, and no mark is represented as registered.
- No benchmarking dataset: no anonymised benchmarking data has yet been collected or published.
- No pseudonymised data: pseudonymised data (GDPR Article 4(5)) is not accepted under the Data Contribution Agreement; only data anonymised so that it is no longer personal data is eligible.
- No regulator or standards-body endorsement of UAIF or of this licensing model is claimed.

Commercial and Mark Enquiries

Commercial use of UAIF — including commercialising UAIF-based products or services — requires a separate written commercial licence from ODA3 Institute under GEL v1.0 Section 17. Requests to use the UAIF-Compatible mark require written authorisation consistent with GEL v1.0 Sections 9.3 and 10.5. Enquiries: CONTACT_AT_ODA3_DOT_ORG

4. Governing Documents

Document	Coverage	Access
GAISSF Ecosystem Licence (GEL) v1.0	Controlling licence for UAIF and the GAISSF Ecosystem; prevails over all UAIF documents	oda3.org/legal/gel-v1-0
UAIF-IP-001 — IP Policy	UAIF IP framework; applies subject to GEL v1.0	docs.oda3.org/publications
UAIF-CLA-002 — Contributor Licence Agreement	ICLA and ECLA for specification contributors	docs.oda3.org/publications
UAIF-LIC-003 — Commercial Licence Template	Sector Calibration Package terms	On request: CONTACT_AT_ODA3_DOT_ORG
UAIF-DCA-004 — Data Contribution Agreement	Benchmarking data contribution terms	On request: CONTACT_AT_ODA3_DOT_ORG
UAIF-TM-005 — Trademark and Brand Policy	Mark usage rules; permitted and prohibited uses	docs.oda3.org/publications
UAIF-CGC-006 — Certification Governance Charter	Proposed governance for any future UAIF certification: committee composition, ODA3 Institute certification authority (Path A), assessment process, appeals	On request: CONTACT_AT_ODA3_DOT_ORG
UAIF-DPR-007 — Defensive Publication Template	Algorithm prior-art disclosure process	On request: CONTACT_AT_ODA3_DOT_ORG
ODA3-2026-06-EXB-STD-001 — UAIF Executive Brief	Programme overview, framework summary, commercial rationale for decision-makers	docs.oda3.org/frameworks/uaif
ODA3-2026-06-TCR-STD-002 — UAIF Technical Specification	Core schema specification, severity scoring, sector mapping, implementation checklist	docs.oda3.org/frameworks/uaif
ODA3-2026-06-TCR-STD-003 — UAIF Schema Specification	Normative JSON Schema, profile definitions, conditional validation rules, reference implementation examples and interchange requirements	docs.oda3.org/frameworks/uaif
